Independent Auditor's Report

To the Shareholders of Arena Minerals Inc.

Opinion

We have audited the consolidated financial statements of Arena Minerals Inc. and its subsidiary (the "Company"), which comprise the consolidated statements of financial position as at December 31, 2018 and 2017, and the consolidated statements of operations and comprehensive loss, consolidated statements of cash flows, and consolidated statements of changes in equity for the years then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the consolidated financial position of the Company as at December 31, 2018 and 2017, and its consolidated financial performance and its consolidated cash flows for the years then ended in accordance with International Financial Reporting Standards ("IFRS").

Basis for opinion

We conducted our audit in accordance with Canadian generally accepted auditing standards. Our responsibilities under those standards are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Company in accordance with the ethical requirements that are relevant to our audit of the consolidated financial statements in Canada. We have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other information

Management is responsible for the other information. The other information comprises the Management's Discussion and Analysis.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

We obtained the Management's Discussion and Analysis prior to the date of this auditor's report. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of management and those charged with governance for the consolidated financial statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with IFRS, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or cease operations, or has no realistic alternative but to do so.

Those charged with governance are responsible for overseeing the Company's financial reporting process.

Auditor's responsibilities for the audit of the consolidated financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with Canadian generally accepted auditing standards will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with Canadian generally accepted auditing standards, we exercise professional judgement and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risks of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

The engagement partner of the audit resulting in this independent auditor's report is Glen McFarland.

See accompanying notes to these consolidated financial statements

1. Nature of operations and going concern

Arena Minerals Inc. (the "Company", or "Arena") is a copper exploration company engaged in the acquisition, exploration and development of properties located in South America. The Company is a publicly listed company incorporated in the Province of Alberta and continued to the Province of Ontario. The Company's shares are listed on the TSX Venture Exchange ("TSX-V"). The Company's head office is located at 120 Adelaide Street West, Suite 1410, Toronto, Ontario, Canada M5H 1T1.

The business of mining and exploring for minerals involves a high degree of risk and there can be no assurance that current exploration programs will result in profitable mining operations. The recoverability of the carrying value of interests in exploration and evaluation assets and the Company's continued existence is dependent upon the preservation of its interests in the underlying properties, the discovery of economically recoverable reserves, the achievement of profitable operations, or the ability of the Company to raise additional financing, if necessary, or alternatively upon the Company's ability to dispose of its interests on an advantageous basis. Changes in future conditions could require material write-downs of the carrying values. The Company's assets may also be subject to increases in taxes and royalties, renegotiation of contracts, currency exchange fluctuations and restrictions, and political uncertainty.

Although the Company has taken steps to verify title to the properties on which it is conducting exploration and in which it has an interest, in accordance with industry standards for the current stage of exploration of such properties, these procedures do not guarantee the Company's title. Property title may be subject to government licensing requirements, social licensing requirements, unregistered prior agreements, unregistered claims, aboriginal claims and non-compliance with regulatory and environmental requirements.

If the property option renewals are not approved, the Company's exploration properties and exploration and evaluation assets may be impaired.

At December 31, 2018, the Company had working capital of $2,026,941 and a cumulative loss since inception of $11,223,315. The Company has a need for equity capital and financing for working capital and exploration and development of its properties. Because of continuing operating losses, the Company's continuance as a going concern is dependent upon its ability to obtain adequate financing and to reach profitable levels of operation. It is not possible to predict whether financing efforts will be successful or if the Company will attain profitable levels of operations. Management believes it will be successful in raising the necessary funding to continue operations in the normal course of operations, however, there is no assurance that these funds will be available on terms acceptable to the Company or at all.

2. Basis of preparation

(a) Basis of presentation

These consolidated financial statements of the Company and its subsidiary were prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") applicable to the preparation of financial statements, including IAS 1 – Financial Reporting.

The consolidated financial statements comprise the financial statements of the Company and its wholly-owned subsidiaries: Arena Minerals Chile SpA and Antofalla Minerals S.A. All material intercompany transactions and balances between its subsidiary have been eliminated on consolidation.

(b) Approval of the financial statements

These consolidated financial statements of the Company were approved for issue by the Board of Directors on April 29, 2019.

(c) New and future accounting changes

Certain new standards, interpretations, amendments and improvements to existing standards were issued by the IASB or IFRIC that are mandatory for accounting periods beginning on January 1, 2019 or later. Updates that are not applicable or are not consequential to the Company have been excluded.

2. Basis of preparation (continued)

(c) New and future accounting changes (continued)

IAS 1 – Presentation of Financial Statements ("IAS 1") and IAS 8 – Accounting Policies, Changes in Accounting Estimates and Errors ("IAS 8") were amended in October 2018 to refine the definition of materiality and clarify its characteristics. The revised definition focuses on the idea that information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The amendments are effective for annual reporting periods beginning on or after January 1, 2020. Earlier adoption is permitted.

IFRS 3 – Business Combinations ("IFRS 3") and IFRS 11 – Joint Arrangements ("IFRS 11") were amended in December 2017. IFRS 3 was amended to clarify that when a party to a joint arrangement obtains control of a business that is a joint operation, it re-measures previously held interests in that business. IFRS 11 was amended to clarify that when a party that participates in, but does not have joint control of, a joint operation obtains joint control of a business that is a joint operation, the entity does not re-measure previously held interests in that business.

IFRS 10 – Consolidated Financial Statements ("IFRS 10") and IAS 28 – Investments in Associates and Joint Ventures ("IAS 28") were amended in September 2014 to address a conflict between the requirements of IAS 28 and IFRS 10 and clarify that in a transaction involving an associate or joint venture, the extent of gain or loss recognition depends on whether the assets sold or contributed constitute a business. The effective date of these amendments is yet to be determined, however early adoption is permitted.

IFRS 16 – Leases ("IFRS 16") was issued in January 2016 and replaces IAS 17 – Leases as well as some lease related interpretations. With certain exceptions for leases under twelve months in length or for assets of low value, IFRS 16 states that upon lease commencement a lessee recognises a right-of-use asset and a lease liability. The right-of-use asset is initially measured at the amount of the liability plus any initial direct costs. After lease commencement, the lessee shall measure the right-of-use asset at cost less accumulated depreciation and accumulated impairment. A lessee shall either apply IFRS 16 with full retrospective effect or alternatively not restate comparative information but recognise the cumulative effect of initially applying IFRS 16 as an adjustment to opening equity at the date of initial application. IFRS 16 requires that lessors classify each lease as an operating lease or a finance lease. A lease is classified as a finance lease if it transfers substantially all the risks and rewards incidental to ownership of an underlying asset. Otherwise it is an operating lease. IFRS 16 is effective for annual periods beginning on or after January 1, 2019.

IFRIC 23 – Uncertainty Over Income Tax Treatments ("IFRIC 23") was issued in June 2017 and clarifies the accounting for uncertainties in income taxes. The interpretation committee concluded that an entity shall consider whether it is probable that a taxation authority will accept an uncertain tax treatment. If an entity concludes it is probable that the taxation authority will accept an uncertain tax treatment, then the entity shall determine taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates consistently with the tax treatment used or planned to be used in its income tax filings. If an entity concludes it is not probable that the taxation authority will accept an uncertain tax treatment, the entity shall reflect the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses and credits or tax rates. IFRIC 23 is effective for annual periods beginning on or after January 1, 2019.

Effective January 1, 2018, the Company adopted IFRS 9, Financial Instruments, which resulted in a change in the accounting policy as described below. In accordance with the transitional provision in the standard, the Company adopted this standard retrospectively without restating comparatives, with the cumulative impact adjusted in the opening balances as at January 1, 2018. There were no effects on opening balances at January 1, 2018 with respect to the adoption of this policy.

IFRS 9 replaces International Accounting Standard ("IAS") 39, Financial Instruments: Recognition and Measurement. IFRS 9 introduces new requirements for the classification, measurement and impairment of financial assets and hedge accounting. It establishes two primary measurement categories for financial assets: (i) amortized cost and (ii) fair value either through profit or loss ("FVPL") or through other comprehensive income ("FVOCI"); establishes criteria for the classification of financial assets within each measurement category based on business model and cash flow characteristics; and eliminates the existing held for trading, held to maturity, available for sale, loans and receivable and other financial liabilities categories.

2. Basis of preparation (continued)

(c) New and future accounting changes (continued)

IFRS 9 also introduces a new expected credit loss model for the purpose of assessing the impairment of financial assets and requires that there be a demonstrated economic relationship between the hedged item and hedging instrument.

Upon adoption of IFRS 9, the two main changes in the Company's accounting policy on financial instruments are: i) equity investments previously classified as available-for-sale are now classified as financial assets measured at FVOCI and ii) derivative instruments previously held for trading now qualify for hedge accounting, including the Company's commodity swap and option contracts, to the extent they comply with the IFRS 9 criteria for hedge accounting.

The following table shows the previous classification under IAS 39 and the new classification under IFRS 9 for the Company's financial instruments:

	Original classification under IAS 39	New classification under IFRS 9
Cash	Loans and receivables - amortized cost	Amortized cost
Receivables	Loans and receivables - amortized cost	Amortized cost
Investments	Held for trading	FVPL
Accrued liabilities	Other financial liabilities - amortized cost	Amortized cost
Trade and other payables	Other financial liabilities - amortized cost	Amortized cost

The Company adopted IFRS 9 retrospectively without restating comparatives and therefore the comparative information in respect of financial instruments for the year ended December 31, 2017 was accounted for in accordance with the Company's previous accounting policy under IAS 39.

(d) Currency translation

The Company's functional and presentation currency, and the functional currency of the Company's subsidiaries, is the Canadian dollar ("$"). Transactions in currencies other than the entity's functional currency (foreign currencies) are recognized at the rates of exchange prevailing at the dates of the transactions. At the end of each reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when the fair value was determined.

(e) Significant accounting judgments, estimates and assumptions

The preparation of these consolidated financial statements in conformity with IFRS requires the Company's management to make judgments, estimates and assumptions about future events that affect the amounts reported in the consolidated financial statements and related notes to the financial statements. Although these estimates are based on management's best knowledge of the amount, event or actions, actual results may differ from those estimates and these differences could be material.

The areas which require management to make significant judgments, estimates and assumptions in determining carrying values include, but are not limited to:

Assets' carrying values and impairment charges
In the determination of carrying values and impairment charges, management looks at the higher of recoverable amount or fair value less costs to sell in the case of assets and at objective evidence, significant or prolonged decline of fair value on financial assets indicating impairment. These determinations and their individual assumptions require that management make a decision based on the best available information at each reporting period.

Capitalization of exploration and evaluation costs
Management has determined that exploration and evaluation costs incurred during the year have future economic benefits and are economically recoverable. In making this judgment, management has assessed various sources of information including but not limited to the geologic and metallurgic information, history of conversion of mineral deposits to proven and probable mineral reserves, scoping and feasibility studies, proximity of operating facilities, operating management expertise and existing permits. See Note 6 for details of capitalized exploration and evaluation costs.

2. Basis of preparation (continued)

(e) Significant accounting judgments, estimates and assumptions (continued)

Impairment of exploration and evaluation assets
While assessing whether any indications of impairment exist for exploration and evaluation assets, consideration is given to both external and internal sources of information. Information the Company considers includes changes in the market, economic and legal environment in which the Company operates that are not within its control that could affect the recoverable amount of exploration and evaluation assets. Internal sources of information include the manner in which exploration and evaluation assets are being used or are expected to be used and indications of expected economic performance of the assets. Reductions in commodity price forecasts, increases in estimated future costs of production, increases in estimated future capital costs, reductions in the amount of recoverable mineral reserves and mineral resources and/or adverse current economics can result in a write-down of the carrying amounts of the Company's exploration and evaluation assets.

Estimation of decommissioning and restoration costs and the timing of expenditure
Cost estimates are updated annually during the life of a project to reflect known developments, (e.g. revisions to cost estimates and to the estimated lives of operations), and are subject to review at regular intervals. Decommissioning, restoration and similar liabilities are estimated based on the Company's interpretation of current regulatory requirements, constructive obligations and are measured at fair value. Fair value is determined based on the net present value of estimated future cash expenditures for the settlement of decommissioning, restoration or similar liabilities that may occur upon decommissioning of the mine. Such estimates are subject to change based on changes in laws and regulations and negotiations with regulatory authorities. As at December 31, 2018 and 2017, the Company estimated that it had no material decommissioning or restoration obligations.

Taxes, income taxes and deferred taxes
The Company is subject to income and other taxes in various jurisdictions. Significant judgment is required in determining the Company's provisions for taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. The Company recognizes liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. The determination of the Company's income and other tax liabilities requires interpretation of complex laws and regulations often involving multiple jurisdictions. The Company's interpretation of taxation law as applied to transactions and activities may not coincide with the interpretation of the tax authorities. All tax filings are subject to audit and potential reassessment subsequent to the financial statement reporting period. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the tax related accruals and deferred income tax provisions in the period in which such determination is made. All estimates for value added and withholding taxes have been included in accounts payable and accrued liabilities.

Share-based payments
Management determines costs for share-based payments using the Black-Scholes valuation method, a market-based valuation technique. The fair value of the market-based and performance-based share awards are determined at the date of grant using generally accepted valuation techniques. Assumptions are made and judgment used in applying valuation techniques. These assumptions and judgments include estimating the future volatility of the stock price, expected dividend yield, future employee turnover rates and future employee stock option exercise behaviors and corporate performance. Such judgments and assumptions are inherently uncertain. Changes in these assumptions affect the fair value estimates.

Commitments and contingencies
Refer to Note 14.

3. Significant accounting policies

(a) Principles of consolidation

These consolidated financial statements include all the assets, liabilities, revenues, expenses and cash flows of the Company and its wholly-owned subsidiary Arena Minerals Chile SpA. All material intercompany transactions and balances between the subsidiary and the Company are eliminated on consolidation. Subsidiaries are entities over which the Company is exposed to, or has rights to, variable returns as well as the ability to affect those returns through the power to direct the relevant activities of the entity. Subsidiaries are fully consolidated from the date control is transferred to the Company, and are de-consolidated from the date control ceases.

(b) Cash

Cash in the statement of financial position comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less.

(c) Exploration and evaluation assets

Once a right to explore an area has been secured, expenditures on exploration and evaluation activities are capitalized to exploration and evaluation assets. Exploration expenditure relates to the initial search for deposits with economic potential and to detailed assessments of deposits or other projects that have been identified as having economic potential.

Management reviews the carrying value of capitalized exploration and evaluation assets at least annually. The review is based on a status report regarding the Company's intentions for development of the undeveloped property.

Once an economically viable reserve has been determined for an area and the decision to proceed with development has been approved, exploration and evaluation assets attributable to that area are first tested for impairment and then reclassified to construction in progress within property, plant and equipment.

Subsequent recovery of the resulting carrying value depends on successful development or sale of the undeveloped project. If a project does not prove viable, all irrecoverable costs associated with the project net of any impairment provisions are written off.

(d) Equipment

Equipment is generally depreciated on a straight-line basis at a rate of 20% to 50% per annum.

An item of equipment and any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on de-recognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognized. The assets' residual values, useful lives and methods of depreciation/amortization are reviewed at each reporting period, and adjusted prospectively if appropriate.

(e) Impairment of non-financial assets

The carrying values of capitalized exploration and evaluation assets and equipment are assessed for impairment when indicators of such impairment exist. If any indication of impairment exists, an estimate of the asset's recoverable amount is calculated. The recoverable amount is determined as the higher of the fair value less costs to sell for the asset and the asset's value in use. If the carrying amount of the asset exceeds its recoverable amount, the asset is impaired and an impairment loss is charged to the operations so as to reduce the carrying amount to its recoverable amount. When a subsequent event causes the amount of impairment loss to decrease, the decrease in impairment loss is reversed through the statement of operations.

(f) Provisions

I. General

Provisions are recognized when (a), the Company has a present obligation (legal or constructive) as a result of a past event, and (b), it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate can be made of the amount of the obligation. If the effect of the time value of money is material, provisions are discounted using a current pre tax rate that reflects, where appropriate, the risks specific to the

3. Significant accounting policies (continued)

(f) Provisions (continued)

liability. Where discounting is used, the increase in the provision due to the passage of time is recognized as a finance cost.

II. Decommissioning and restoration provision

The Company records the present value of estimated costs of legal and constructive obligations required to restore locations in the period in which the obligation is incurred.

The obligation generally arises when an asset is installed or the ground / environment is disturbed at the property location. When the liability is initially recognized, the present value of the estimated cost is capitalized by increasing the carrying amount of the related mining assets to the extent that it was incurred prior to the production of related ore. Over time, the discounted liability is increased for the change in present value based on the discount rates that reflect current market assessments and the risks specific to the liability. The periodic unwinding of the discount is recognized in operations as a finance cost. Additional disturbances or changes in rehabilitation costs will be recognized as additions or charges to the corresponding assets and rehabilitation liability when they occur.

As at December 31, 2018 and 2017, the Company did not have any material decommissioning and restoration obligations.

(g) Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

I. Current tax

The tax currently payable is based on taxable profit for the year. Taxable profit or loss differs from profit or loss as reported in the consolidated statement of operations because of items of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Company's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

II. Deferred tax

Deferred tax is recognized on temporary differences between the carrying amounts of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognized for all taxable temporary differences. Deferred tax assets are generally recognized for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilized. Such deferred tax assets and liabilities are not recognized if the temporary difference arises from the initial recognition (other than in a business combination) of other assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit.

Deferred tax liabilities are recognized for taxable temporary differences associated with investments in subsidiaries and associates, and interests in joint ventures, except where the Company is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognized to the extent that it is probable that there will be sufficient taxable profits against which to utilize the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset realized, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period. The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Company expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

3. Significant accounting policies (continued)

(g) Taxation (continued)

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

(h) Share-based payments

Equity-settled share-based payments to employees and others providing similar services are measured at the fair value of the equity instruments at the grant date. Details regarding the determination of the fair value of equity-settled share-based transactions are set out in note 9.

The fair value is determined at the grant date of the equity-settled share-based payments and is recognized on a graded vesting basis over the period during which the employee becomes unconditionally entitled to equity instruments, based on the Company's estimate of equity instruments that will eventually vest. At the end of each reporting period, the Company revises its estimate of the number of equity instruments expected to vest. The impact of the revision of the original estimates, if any, is recognized in profit or loss such that the cumulative expense reflects the revised estimate, with a corresponding adjustment to the equity-settled employee benefits reserve.

Equity-settled share-based payment transactions with parties other than employees are measured at the fair value of the goods or services received, except where that fair value cannot be estimated reliably, in which case they are measured at the fair value of the equity instruments granted, measured at the date the entity obtains the goods or the counterparty renders the service.

On expiry, the grant date fair value of any unexercised share-based payments (options and warrants) is charged to retained earnings (deficit).

(i) Financial assets and liabilities

<u>Accounting policy under IFRS 9 applicable from January 1, 2018</u>

Financial assets

I. Initial recognition and measurement

Non-derivative financial assets within the scope of IFRS 9 are classified and measured as "financial assets at fair value", as either FVPL or FVOCI, and "financial assets at amortized costs", as appropriate. The Company determines the classification of financial assets at the time of initial recognition based on the Company's business model and the contractual terms of the cash flows.

All financial assets are recognized initially at fair value plus, in the case of financial assets not at FVPL, directly attributable transaction costs on the trade date at which the Company becomes a party to the contractual provisions of the instrument.

Financial assets with embedded derivatives are considered in their entirety when determining their classification at FVPL or at amortized cost.

II. Subsequent measurement – financial assets at amortized cost

After initial recognition, financial assets measured at amortized cost are subsequently measured at the end of each reporting period at amortized cost using the Effective Interest Rate ("EIR") method. Amortized cost is calculated by taking into account any discount or premium on acquisition and any fees or costs that are an integral part of the EIR. The EIR amortization is included in finance income in the consolidated statements of operations. Receivables held for collection of contractual cash flows are measured at amortized cost.

III. Subsequent measurement – financial assets at FVPL

Financial assets measured at FVPL include financial assets management intends to sell in the short term and any derivative financial instrument that is not designated as a hedging instrument in a hedge relationship. Financial assets measured at FVPL are carried at fair value in the consolidated statements of financial position with changes in fair value

3. Significant accounting policies (continued)

(i) Financial assets and liabilities (continued)

recognized in other income or expense in the consolidated statements of operations. The Company's investments are classified as financial assets at FVPL.

IV. Subsequent measurement – financial assets at FVOCI

Financial assets measured at FVOCI are non-derivative financial assets that are not held for trading and the Company has made an irrevocable election at the time of initial recognition to measure the assets at FVOCI. The Company does not measure any financial assets at FVOCI.

After initial measurement, investments measured at FVOCI are subsequently measured at fair value with unrealized gains or losses recognized in other comprehensive income or loss in the consolidated statements of comprehensive loss. When the investment is sold, the cumulative gain or loss remains in accumulated other comprehensive income or loss and is not reclassified to profit or loss.

Dividends from such investments are recognized in other income in the consolidated statements of operations when the right to receive payments is established.

V. Derecognition

A financial asset is derecognized when the contractual rights to the cash flows from the asset expire, or the Company no longer retains substantially all the risks and rewards of ownership.

VI. Impairment of financial assets

The Company's only financial assets subject to impairment are other accounts receivable, which are measured at amortized cost. The Company has elected to apply the simplified approach to impairment as permitted by IFRS 9, which requires the expected lifetime loss to be recognized at the time of initial recognition of the receivable. To measure estimated credit losses, accounts receivable have been grouped based on shared credit risk characteristics, including the number of days past due. An impairment loss is reversed in subsequent periods if the amount of the expected loss decreases and the decrease can be objectively related to an event occurring after the initial impairment was recognized.

Financial liabilities

I. Initial recognition and measurement

Financial liabilities are measured at amortized cost, unless they are required to be measured at FVPL as is the case for held for trading or derivative instruments, or the Company has opted to measure the financial liability at FVPL. All financial liabilities are recognized initially at fair value and in the case of long-term debt, net of directly attributable transaction costs.

II. Subsequent measurement – financial liabilities at amortized cost

After initial recognition, financial liabilities measured at amortized cost are subsequently measured at the end of each reporting period at amortized cost using the EIR method. Amortized cost is calculated by taking into account any discount or premium on acquisition and any fees or costs that are an integral part of the EIR. The EIR amortization is included in finance cost in the consolidated statements of operations. The Company's financial liabilities include accounts payable and accruals, which are each measured at amortized cost.

III. Derecognition

A financial liability is derecognized when the obligation under the liability is discharged, cancelled or expires with any associated gain or loss recognized in other income or expense in the consolidated statements of operations.

3. Significant accounting policies (continued)

(i) Financial assets and liabilities (continued)

Accounting policy under IAS 39 applicable prior to January 1, 2018

The accounting policy under IAS 39 for the comparative information presented in respect of financial assets and bilities, excluding derivative instruments related to hedging activities, was similar to the accounting policy adopted in 2018, with the following exceptions:

Financial assets

I. Initial recognition and measurement

Non-derivative financial assets within the scope of IAS 39 were classified as "financial assets at fair value through profit or loss", "loans and receivables", or "available-for-sale financial assets", as appropriate. The Company determines the classification of its financial assets at initial recognition.

II. Subsequent measurement – Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss included financial assets held for trading and financial assets designated upon initial recognition at fair value through profit or loss. Financial assets were classified as held for trading if management intended to sell the financial assets in the short term. This category included any derivative financial instrument that was not designated as a hedging instrument in a hedge relationship under IAS 39.

Derivatives embedded in host contracts were accounted for as separate derivatives and recorded at fair value if their economic characteristics and risks were not closely related to those of the host contracts. Host contracts were not held for trading or designated at fair value through profit or loss. These embedded derivatives were measured at fair value with changes in fair value recognized in the consolidated statements of operations. Reassessment only occurred if there was a change in the terms of the contract that significantly modified the cash flows that would have otherwise been required.

III. Impairment of financial assets

The Company assessed at each reporting date whether there was any objective evidence that a financial asset or a group of financial assets was impaired. A financial asset or a group of financial assets was deemed to be impaired if there were objective evidence of impairment as a result of one or more events that had occurred after the initial recognition of the asset (an incurred "loss event") and the loss had an impact on the estimated cash flows of the financial asset or group of assets that could be reliably estimated.

For financial assets carried at amortized cost, the Company considered evidence of impairment at both a specific asset and collective level. Objective evidence could include the default or delinquency of a debtor or restructuring of an amount due to the Company on terms that the Company would not consider otherwise.

All individually significant financial assets were assessed for specific impairment. Financial assets that were not individually significant were collectively assessed for impairment by grouping together financial assets with similar risk characteristics. If there were objective evidence that an impairment had incurred, the amount of the charge was recognized in the consolidated statements of operations and was measured as the difference between the asset's carrying amount and the present value of estimated future cash flows, excluding future credit losses that had not yet been incurred. If, in a subsequent period, the estimated impairment charge decreased because of an event, any reversal would have been credited to profit or loss.

(j) Interest revenue

Interest revenue is recognized when it is probable that the economic benefits will flow to the Company and the amount of revenue can be measured reliably. Interest revenue is accrued on a time basis, by reference to the principal outstanding and at the effective interest rate applicable, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to that asset's net carrying amount on initial recognition.

3. Significant accounting policies (continued)

(k) Finance costs

Finance costs comprise interest payable on borrowings calculated using the effective interest rate method and foreign exchange gains and losses on foreign currency borrowings.

(l) Loss per share

Basic loss per share is calculated by dividing the loss available to common shareholders by the weighted average number of common shares outstanding in the period. For all periods presented, the loss available to common shareholders equals the reported loss. Diluted loss per share is calculated assuming that the proceeds to be received on the exercise of dilutive share options and warrants are used to repurchase common shares at the average market price during the period. In the Company's case, diluted loss per share is the same as basic loss per share for 2018 and 2017 as the effects of including all outstanding options and warrants would be anti-dilutive.

4. Receivables

		December 31, 2018		December 31, 2017
HST receivable	$	18,273	$	18,612
Supplier advances		11,600		7,404
Due from JOGMEC		-		51,591
	$	29,873	$	77,607

Receivables disclosed above are classified as loans and receivables and are therefore measured at amortized cost.

5. Investments, at fair value through profit and loss

Description		Cost		Estimated Fair Value
B2Gold Corp.	$	779,118	$	834,200
Fiore Exploration Ltd.		5,639,486		2,023,274
As at December 31, 2017	$	6,418,604	$	2,857,474
B2Gold Corp.	$	616,047	$	678,299
Fiore Exploration Ltd.		2,748,825		381,030
As at December 31, 2018	$	3,364,872	$	1,059,329

<u>B2Gold Corp.</u>

During the year ended December 31, 2018, the Company sold 45,000 shares of B2Gold for gross proceeds of $162,113 for a realized loss of $957. As at December 31, 2018, the quoted market value of these shares was $678,299 resulting in an unrealized gain of $7,171 being included in loss for the period.

During the year ended December 31, 2017, the Company sold 215,000 shares of B2Gold for gross proceeds of $709,866 for a realized gain of $43,159. As at December 31, 2017, the quoted market value of these shares was $834,200 resulting in an unrealized gain of $229,011 charged against the loss for the year ended December 31, 2017.

<u>Fiore Exploration Ltd.</u>

On August 4, 2016, the Company closed its transaction with Fiore Exploration Ltd. (formerly Rouge Resources Ltd.) ("Fiore") on the sale of the Pampas el Peñon gold project in Chile. Arena's interest consisted of two option agreements with Sociedad Química Y Minera de Chile S.A ("SQM"). The Company received 9,550,000 common shares of Fiore valued at $6,207,500 based on Fiore's closing market price on the date when these shares were received recognizing a gain of

5. Investments, at fair value through profit and loss (continued)

$4,872,342 on the disposition of the properties. During the year ended December 31, 2017, the Company sold 639,500 shares of Fiore for gross proceeds of $300,124 for a realized loss of $266,071. As at December 31, 2017, the quoted market value of these shares was $2,023,274 resulting in an unrealized loss of $1,897,212 included in loss for the year ended December 31, 2017.

During the year ended December 31, 2018, the Company sold 1,178,500 shares of Fiore for gross proceeds of $517,124 for a realized loss of $2,368,924. As at December 31, 2018, the quoted market value of these shares was $381,030 resulting in an unrealized gain of $1,248,416 included in loss for the year ended December 31, 2018.

6. Exploration and evaluation assets

	Atacama Copper, Chile	La Finca, Chile	Antofalla Minerals	Total
Balance, December 31, 2016	$ 2,453,747	$ -	$ -	$ 2,453,747
Additions	743,637	112,642	-	856,279
Balance, December 31, 2017	$ 3,197,384	$ 112,642	$ -	$ 3,310,026
Additions	1,061,069	-	1,286,089	2,347,158
Write-off	-	(112,642)	-	(112,642)
Balance, December 31, 2018	$ 4,258,453	$ -	$1,286,089	$ 5,544,542

Exploration and evaluation properties comprise the following:

a) Atacama Copper Property, Chile

On August 1, 2013, the Company entered into a definitive option agreement with a Chilean mining company (the “Vendor”) to earn an 80% interest in the Atacama copper property. In consideration for the assignment of the option agreement, the Company will be required to:

1) Make an aggregate cash payment to the Vendor as follows:
   - US$1 per hectare on signing (paid);
   - US$3 per hectare, or a maximum of US$450,000 on or before July 26, 2014 (paid);
   - US$6 per hectare, or a maximum of US$600,000 on or before July 26, 2015 (paid);
   - US$15 per hectare, or a maximum of US$750,000 on or before July 26, 2016 (paid);
   - US$30 per hectare, for a total of US$211,830 paid on July 3, 2018

2) Incur exploration and development expenditures on the worked claims over the option term as follows:
   - US$5 per hectare, or a maximum of US$750,000 by July 26, 2014 (incurred);
   - An additional US$10 per hectare, or a maximum of US$1,000,000 by July 26, 2015 (incurred);
   - An additional US$30 per hectare, or a maximum of US$1,500,000 by July 26, 2016 (incurred);
   - An additional US$60 per hectare, or a maximum of US$3,000,000 by July 26, 2017. (incurred);

The Company would have been able to exercise the option on a maximum of 50,000 ha (500 square kilometers) at its discretion. The Company was not restricted in the selection of the area it chooses to retain, allowing it to retain the high priority targets it identifies in the early stage exploration program. The terms of the agreement consisted of total obligations that are not to exceed US$6.25 million over 48 months in work commitment in addition to a maximum cash payments totaling US$3,593,500. At all times during the term of the option agreement, the Company had the right to relinquish any parts of the Atacama Copper Property back to the Vendor with no further liability or payment obligations. The Vendor would retain a 3% net smelter royalty on all metallic minerals.

6. Exploration and evaluation assets (continued)

In November 2016, the Company successfully negotiated an extension of the mandatory land reduction schedule with Socided Quimica y Minela de Chile S.A. ("SQM"), whereby the Company was required to reduce the total holdings in the Atacama Copper project to a maximum of 50,000 hectares, which in turn required the JOGMEC joint venture to reduce its land holding to 10,000 hectares. Under the revised terms, the JOGMEC joint venture shall continue to carry approximately 27,000 hectares through to July 27, 2017, upon which date it shall have to reduce the property holdings to 10,000 hectares. This means Arena will retain approximately 67,000 hectares as part of the Atacama Copper project through to July 27, 2017 at which point the total land holding shall be reduced to a maximum of 50,000 hectares. At present, the balance of the 67,000 hectares is held by Arena.

On September 5, 2017, the Company secured an extension agreement with SQM on Atacama, effectively extending the option exercise date from July 27, 2017 to April 30, 2018.

On November 1, 2017, the Company exercised the underlying Atacama option agreement on two projects consisting of a total of 7,061 hectares. The two projects were retained by the Company, due to JOGMEC and Teck opting out of their agreements on November 1. These are the epithermal gold Paciencia project and the copper porphyry Pampa Union project, which are agreed to be split with SQM on a 80% Arena and 20% SQM basis.

<u>JOGMEC Option</u>

On July 16, 2015, the Company entered into a binding definitive agreement with Japan Oil, Gas and Metals National Corporation ("JOGMEC"), pursuant to which Arena has granted JOGMEC the option to acquire up to a 60% interest in 10,000 hectares to be selected from 30,000 hectares of the Company's Atacama Copper Property, located in Antofagasta, Chile (the "Agreement"). The hectares optioned include the majority of the land lying between the Cerro Barco and La Paloma properties, consisting of three separate claim blocks, which have been designated Carmen Alto, Pampa Union and Cerro Guacate Sur.

Pursuant to the revised agreement with SQM on mandatory land reduction, JOGMEC was required to make an additional payment of US$100,000 and incur an additional exploration expenditure of US$150,000 by December 31, 2016.

On November 1, 2017, JOGMEC opted out of their joint venture agreement with the Company. However, JOGMEC continued to reimburse expenditures on the property to March 31, 2018.

<u>Teck Option</u>

On October 23, 2015, the Company's Chilean subsidiary signed an option/joint venture agreement with Teck Resources Chile Limitada ("Teck Chile"), amended on July 21, 2016, a Chilean subsidiary of Teck Resources Limited ("Teck"), pursuant to which Arena has granted Teck Chile options to acquire up to a 60% interest in the Solitario and Paciencia North prospects, which consist of two separate claim blocks (collectively the "Property") that comprise part of the Company's Atacama Copper property, located in Antofagasta, Chile.

On November 1, 2017, Teck opted out of their joint venture agreement with the Company.

b) La Finca, Chile

On May 8, 2017, the Company entered into an agreement to acquire 100% of the La Finca Property, located in Region III of Chile. The Company made one payment on signing of US$50,000 (CAD$62,750). On June 19, 2018, the Company decided not to pursue further exploration on the La Finca property and, as such, has terminated the underlying option agreement with the vendors. The Company was committed to pay restoration costs, but they are estimated to be nil.

c) Antofalla Minerals, Argentina

On November 15, 2018, the Company acquired 100% of of Antofalla Minerals S.A. ("AMSA"), which owns lithium brine projects located in Argentina. The purchase price for all of the outstanding shares of AMSA is US$400,000 (CAD $536,089) in cash and 10,000,000 common shares of the Company valued at $750,000 based on the quoted market value of the Company's shares at the date of acquisition (see Note 8). The vendors are not entitled to any other post-closing royalties or other payments. As AMSA's only material asset was the property interest, and there were no material liabilities, the acquisition was concluded to be an asset acquisition as the requirements of IFRS 3 for a business combination were not met. The purchase price paid was allocated to the exploration and evaluation asset acquired.

6. Exploration and evaluation assets (continued)

One of the mining rights acquired, Santa Moro, is currently under review by the Court of Appeals in Argentina. Currently, the Company does not hold title to the mining rights.

7. Accounts payable and accrued liabilities

	December 31, 2018	December 31, 2017
Corporate payables and corporate accruals	$ 306,723	$ 203,234
Exploration payables	-	43,622
	$ 306,723	$ 246,856

8. Share capital

	Number of Shares	Amount
Balance, December 31, 2016	80,121,090	$ 13,806,322
Warrants exercised	6,500,000	975,000

Balance, December 31, 2017	86,621,090	$ 14,921,687
Private placement	46,000,000	2,300,000
Issued for mineral property (Note 6(c))	10,000,000	750,000
Value of warrants issued with private placement	-	(431,300)
Cost of issue	-	(10,630)
Balance, December 31, 2018	142,621,090	$ 17,529,757

On September 6, 2018, the Company closed a non-brokered private placement financing of 46,000,000 units of the Company at a price of $0.05 per unit for gross proceeds of $2,300,000. Each unit is comprised of one common share of the Company and one common share purchase warrant. Each warrant entitles the holder to acquire one common share of the Company at $0.10 for a period of 36 months. See Note 13 for related party participation and Note 9 for warrant valuation.

See Note 6 for shares issued on the acquisition of AMSA.

9. Reserves

	Options			Warrants			
	Number of Options	Weighted average exercise prices	Value of options	Number of warrants	Weighted average exercise prices	Value of warrants	Total Value

Employee share option plan

The Company has an ownership-based compensation scheme for executives and employees. In accordance with the terms of the plan, as approved by shareholders at a previous annual general meeting, officers, directors and consultants of the Company may be granted options to purchase common shares with the exercise prices determined at the time of grant. The Company has adopted a floating stock option plan (the "Plan"), whereby the number of common shares reserved for issuance under the Plan is equivalent of up to 10% of the issued and outstanding shares of the Company from time to time. Each employee share option converts into one common share of the Company on exercise. No amounts are paid or payable by the recipient on receipt of the option. The options carry neither rights to dividends nor voting rights. Options may be exercised at any time from the date of vesting to the date of their expiry.

The following options were in existence at December 31, 2018:

Number outstanding	Number exercisable	Grant date	Expiry date	Exercise price	Fair value at grant date	Grant date share price	Expected volatility	Remaining life (yrs)	Expected Life	Expected dividend yield	Risk-free interest rate

As at December 31, 2017, there were no warrants outstanding or exercisable.

10. Operating segments

Geographical information

The Company operates in Canada and Chile. The Company's information about its non-current assets by geographical location as at December 31, 2018 and December 31, 2017 are detailed below:

	Current Assets	Exploration and Evaluation Assets	Total Assets
December 31, 2018			
Argentina	$ -	$ 1,286,089	$ 1,286,089
Canada	1,815,070	-	1,815,070
Chile	518,594	4,258,453	4,777,047
	$ 2,333,664	$ 5,544,542	$ 7,878,206
December 31, 2017			
Canada	$ 903,678	$ -	$ 903,678
Chile	2,255,492	3,310,026	5,565,518
	$ 3,159,170	$ 3,310,026	$ 6,469,196

11. Financial instruments

Financial assets and financial liabilities as at December 31, 2018 and 2017 were as follows:

	Other financial liabilities	Assets /(liabilities) at fair value through profit and loss	Total
December 31, 2018			
Cash	$ 1,235,056	$ -	$ 1,235,056
Amounts receivable	11,600	-	11,600
Investments, at fair value through profit and loss	-	1,059,329	1,059,329
Accounts payable and accrued liabilities	(306,723)	-	(306,723)
December 31, 2017			
Cash	$ 214,973	$ -	$ 214,973
Amounts receivable	58,995	-	58,995
Investment	-	2,857,474	2,857,474
Accounts payable and accrued liabilities	(246,856)	-	(246,856)

The Company's risk exposures and the impact on the Company's financial instruments are summarized below. There have been no significant changes in the risks, objectives, policies and procedures for managing risk during the years ended December 31, 2018 and 2017.

Credit risk

Credit risk arises from the non-performance by counterparties of contractual financial obligations. The Company's primary counterparty related to its cash carries an investment grade rating as assessed by external rating agencies. The Company maintains all or substantially all of its cash and cash equivalents with a major financial institution domiciled in Canada. Deposits held with these institutions may exceed the amount of insurance provided on such deposits.

11. Financial instruments (continued)

Liquidity risk

The Company manages liquidity risk by maintaining adequate cash balances. The Company continuously monitors and reviews both actual and forecasted cash flows, and also matches the maturity profile of financial assets and liabilities.

As at December 31, 2018, the Company had current assets of $2,333,664 to settle current liabilities of $306,723.

Market risk

(a) Interest rate risk

The Company's cash is subject to interest rate cash flow risk as they carry variable rates of interest. The Company's interest rate risk management policy is to purchase highly liquid investments with a term to maturity of one year or less on the date of purchase. Based on cash balances on hand at December 31, 2018, a 1% charge in interest rates could result in a corresponding change in annual loss of approximately $12,400.

(b) Currency risk

As the Company operates on an international basis, foreign exchange risk exposures arise from transactions and balances denominated in foreign currencies. The Company's foreign currency risk arises primarily with respect to the Chilean Peso. Fluctuations in the exchange rates between these currencies and the Canadian dollar could have a material effect on the Company's business, financial condition and results of operations. The Company does not engage in any hedging activity to mitigate this risk.

As at December 31, 2018, the Company had the following financial assets and liabilities denominated in foreign currency presented below in Canadian dollars:

		Chilean Peso		US Dollars
Cash	$	4,094	$	93,524
Amounts receivable		-		(47,040)
Accounts payable		(113,721)		(95,439)
	$	(109,627)	$	(48,955)

As at December 31, 2017, the Company had the following financial assets and liabilities denominated in foreign currency presented below in Canadian dollars:

		Chilean Peso		US Dollars
Cash	$	173,224	$	3,811
Amounts receivable		-		51,591
Accounts payable		(13,691)		(8,940)
	$	159,533	$	46,462

A 1% strengthening (weakening) of the Canadian dollar against the Chilean Peso and United States dollar would decrease (increase) net loss by approximately ($41) and ($935), respectively.

Rates as at December 31, 2018 are represented in the following chart:

	December 31, 2018	December 31, 2017
1 US dollar to Canadian dollars	1.3630	1.2550
1 US dollar to Chilean Peso	0.001444	0.001620
1 Canadian dollar to Chilean Peso	0.001962	0.002038

11. Financial instruments (continued)

(c) Price risk

The Company will be exposed to price risk with respect to commodity prices, specifically gold and copper. The Company closely monitors commodity prices to determine the appropriate course of action to be taken by the Company. The Company's future operations will be significantly affected by changes in the market prices of these commodities. Prices fluctuate on a daily basis and are affected by numerous factors beyond the Company's control. The supply and demand for gold and copper, the level of interest rates, the rate of inflation, investment decisions by large holders of gold and copper, and stability of exchange rates can all cause significant fluctuations in prices. Such external economic factors may in turn be influenced by changes in international investment patterns and monetary systems and political developments.

The Company is also exposed to price risk with respect to the Company's financial instruments. The Company exposed to the risk that the fair value of, or future cash flows from, the Company's financial instruments, will significantly fluctuate because of changes in market prices. The Company is exposed to market risk in trading its investments and unfavourable market conditions could result in dispositions of investments at less than quoted market prices.

For the year ended December 31, 2018, a 10% decrease (increase) in the closing prices of its portfolio investments would result in an estimated increase (decrease) in after-tax net loss of $105,932 or approximately $0.00 per share.

(d) Fair value

A fair value hierarchy prioritizes the methods and assumptions used to develop fair value measurements for those financial assets where fair value is recognized on the statement of financial position. These have been prioritized into three levels:

Level 1: Quoted prices in active markets for identical assets or liabilities.
Level 2: Inputs can be a quoted price in market that is not active.
Level 3: Inputs for the asset or liability that are not based on observable market data.

Fair value amounts represent point-in-time estimates and may not reflect fair value in the future. The measurements are subjective in nature, involve uncertainties and are a matter of significant judgment.

At December 31, 2018, the Company's financial instruments that are carried at fair value, consisted of investments of securities of $1,059,329 (December 31, 2017 – $2,857,474) which have been classified as Level 1 within the fair value hierarchy.

12. Capital management

The Company manages and adjusts its capital structure based on available funds in order to support the acquisition, exploration and development of mineral properties. The capital of the Company consists of common shares, warrants and options. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The properties in which the Company currently has an interest are in the exploration and development stage; as such the Company is dependent on external financing to fund its activities. In order to carry out planned exploration and development, and pay for administrative costs, the Company will spend its existing working capital and raise additional amounts as needed.

The Company will continue to assess new properties and seek to acquire an interest in additional properties if it feels there is sufficient geologic or economic potential and if it has adequate financial resources to do so.

Management reviews its capital management approach on an ongoing basis and believes that this approach, given the relative size of the Company, is reasonable. There were no significant changes in the Company's approach to capital management during the years ended December 31, 2018 and 2017. The Company is not subject to externally imposed capital requirements other than that of the TSX-V, which has certain working capital and financial resource requirements to be available to maintain operations and cover general and administration expenses. As of December 31, 2018 and 2017, the Company did not believe it was in violation of such requirements.

13. Related party disclosures

During the private placement that closed on September 6, 2018, directors and officers of the Company participated for proceeds of $560,000 for 11,200,000 units.

During the years ended December 31, 2018 and 2017, the Company entered into the following transactions in the ordinary course of business with related parties that are not subsidiaries of the Company.

	Purchases of goods/services Year ended December 31			
	2018		2017	
2227929 Ontario Inc.	$	-	$	76,275
Fiore Exploration Ltd	$	29,808	$	25,262

The Company shares office space with other companies who may have similar officers and directors. The costs associated with this space are administered by Fiore Exploration Ltd. to which the Company pays a fee. 2227929 Ontario Inc. no longer has any officers or directors in common with the Company. As at December 31, 2018, the Company advanced $Nil to 2227929 Ontario Inc. (December 31, 2017 – $76,275 owing to 2227929 Ontario Inc). Such amount was unsecured, non-interest bearing and has no fixed terms of payment. Vern Arseneau, an officer of the Company, was an officer of Fiore until September 1, 2018.

Compensation of key management personnel of the Company:

The remuneration of directors and other members of key management personnel during the years ended December 31, 2018 and 2017 were as follows:

	2018		2017	
Short-term benefits	$	518,000	$	578,667
Share-based payments	$	192,411	$	-

In accordance with IAS 24, key management personnel are those persons having authority and responsibility for planning, directing and controlling the activities of the Company directly or indirectly, including any directors (executive and non-executive) of the Company.

The remuneration of directors and key executives is determined by the remuneration committee having regard to the performance of individuals and market trends.

At December 31, 2018, the Company had an accounts payable balance of $75,000 (December 31, 2017 - $4,211) owing to its key management and directors for expense reimbursements and fees. Such amounts are unsecured, non-interest bearing and with no fixed terms of payment.

14. Commitments and contingencies

The Company has various commitments described in Note 6.

The Company's exploration activities are subject to various laws and regulations governing the protection of the environment. These laws and regulations are continually changing and generally becoming more restrictive. The Company conducts its operations so as to protect public health and the environment and believes its operations are materially in compliance with all applicable laws and regulations. The Company has made, and expects to make in the future, expenditures to comply with such laws and regulations.

14. Commitments and contingencies (continued)

The Company is party to certain management contracts. These contracts require that additional payments of up to approximately $1,952,500 be made upon the occurrence of certain events such as a change of control. As no triggering event has taken place as at December 31, 2018, the contingent payments have not been reflected in these consolidated financial statements. Minimum commitments remaining under these contracts were approximately $815,000 all due within one year.

See Note 16 for termination subsequent to year end.

The Company has sold, dispersed of, or written down the carrying value of exploration and evaluation property interests. An estimate of the total liability, if any, for which the Company might become obligated as a result of its role as operator, guarantor, or indemnifier is not determinable, nor expected to be material, and no amount has been provided for in these consolidated financial statements.

15. Income Taxes

a) Provision for Income Taxes

Major items causing the Company's effective income tax rate to differ from the combined Federal and Provincial statutory rate of 26.5% (2017 - 26.5%) were as follows:

	2018	**2017**
	$	**$**
Loss before income taxes	(1,919,827)	(2,924,172)
Expected income tax (recovery) based on statutory rate	(509,000)	(775,000)
Adjustment to expected income tax benefit:		
Share based compensation	61,000	5,300
Change in benefit not recognized	448,000	769,700
Deferred income tax provision (recovery)	-	-

b) Deferred Income Taxes

Deferred tax assets have not been recognized in respect of the following deductible temporary differences:

	2018	**2017**
	$	**$**
Non-capital loss carry-forwards - Canada	2,282,000	1,494,000
Share issue costs - Canada	9,000	18,000
Non-capital loss carry-forwards - Chile	8,343,000	7,073,000

Deferred tax assets have not been recognized in respect of these items because it is not probable that future taxable profit will be available against which the Company can use the benefits.

The non-capital loss carryforwards in Canada expire between 2033 and 2038.

The non-capital loss carryforwards in Chile do not expire.

No deferred taxes are recognized on the temporary differences related to the Company's investment in its subsidiary to the extent that the Company controls the timing of the reversal of the temporary differences and it is probable that these differences will not reverse in the forseeable future.

16. Subsequent Events

On March 19, 2019, Eduardo Morales, who joined the Board of Directors in September 2018, was appointed Executive Chairman of the Board. Peter Damouni joined the Board of Directors on March 19, 2019. Mr. Damouni has nearly 18 years of experience in investment banking and capital markets with notable expertise in natural resources. Dan Bruno will be stepping down from the Board of Directors effective May 1, 2019.

On March 19, 2019, the Company granted an aggregate of 750,000 stock options to various directors of the Company. The stock options vest immediately, and are exercisable at $0.06 for a period of five years. The stock options remain subject to a statutory hold period of four months and one day expiring on July 20, 2019.

On April 29, 2019, the Company and Vern Arseneau, an officer of the Company, entered into a settlement in connection with his termination from the Company. The Company is required to pay unpaid consulting fees of $105,000 and a termination payment of $180,000, which is included in Note 14, to Mr. Arseneau.
